To write at these desks, some left-handers must twist their bodies, which can cause students:

- ▶ serious back, neck, and shoulder pain
- ▶ to be unfairly accused of cheating
- ▶ to write slower, a serious disadvantage on important, timed tests (GRE, SAT)
- ▶ to be uncomfortable, frustrated, distracted

A 10-20% left-biased desk purchase strategy only guarantees that during every class period, individual students in individual classrooms suffer.
